

## FLANGE FACER

*Since 1969 Hoffmann Engineering  
have provided specialist engineering  
services to Australia's industry leaders.*

*Quality Assurance accreditation by  
Bureau Veritas complements our  
total quality culture.*

*Our commitment to  
continuous quality improvement  
touches every aspect of our products,  
services and customer support.*

# FLANGE FACER

The Hofmann Flange Facer is a precision machine tool designed to face flanges in-situ within the range of 160mm dia. to 500mm dia.

Using a unique clamping method, the machine can be mounted over the flange to be machined with ease, and by one person.

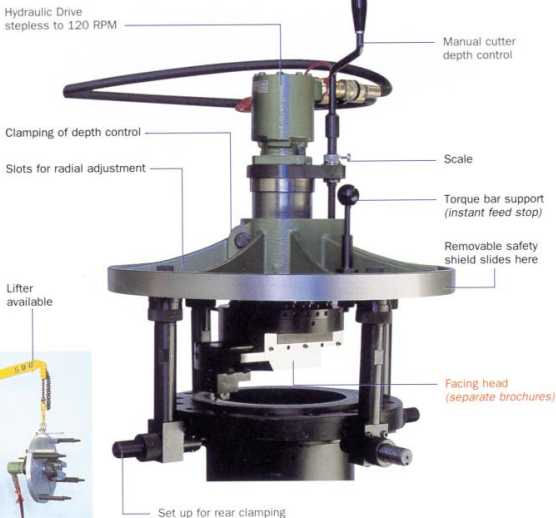

## ADJUSTABLE FEED RATE

The facing head is fitted with an adjustable feed rate giving feed of 0.1mm/rev to 0.7mm/rev, thus allowing finishes from fine through to granophone.

## VIBRATION FREE CUTTING

A cast aluminium face plate combined with sturdy support legs along with the spindle mounted on Timken Taper Bearings, give the machine the rigidity required for vibration free cutting.

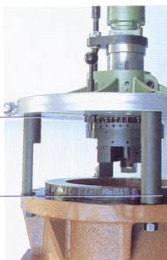

Power for the machine is provided by the standard Hofmann Hydraulic Power Pack, as used on the Hofmann Portable Line Boring Machine.

Hydraulic Power Pack – part of Line Borer (separate brochures)

Holes in face plate to suit class 150 pipe flanges 6" to 18" (Holes may be provided to suit requirements)

For machining raised faces use simple front clamping

## GEAR MANUFACTURING

PRECISION & HEAVY MACHINING

HEAT TREATMENT

ENGINEERING & MINING EQUIPMENT

REPAIRS & MAINTENANCE

SPECIALIST TRANSMISSION REPAIRS
